

Empirical Study

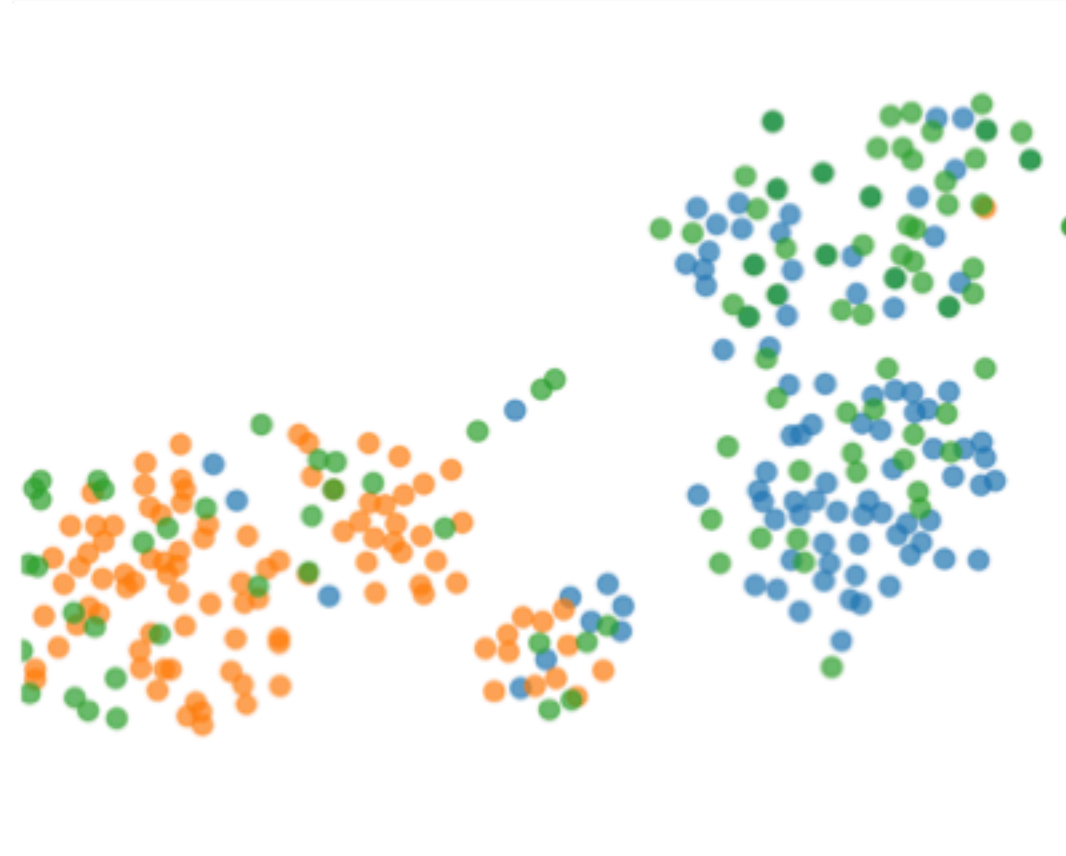

1. How do automaton and instruction embeddings capture similarities across different tasks in latent space?

***RAD**Embeddings*

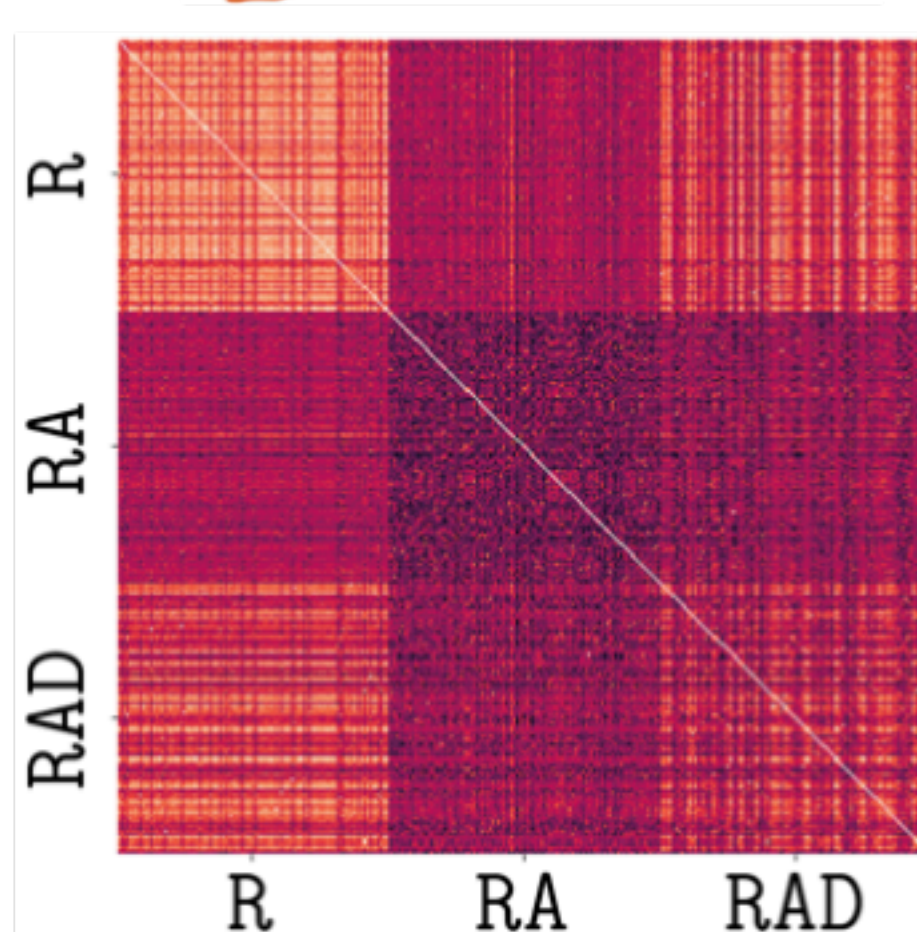

● Reach (R) ● ReachAvoid (RA) ● ReachAvoidDerived (RAD)

 Qwen3-Embedding

***RAD**Embeddings*

 Qwen3-Embedding

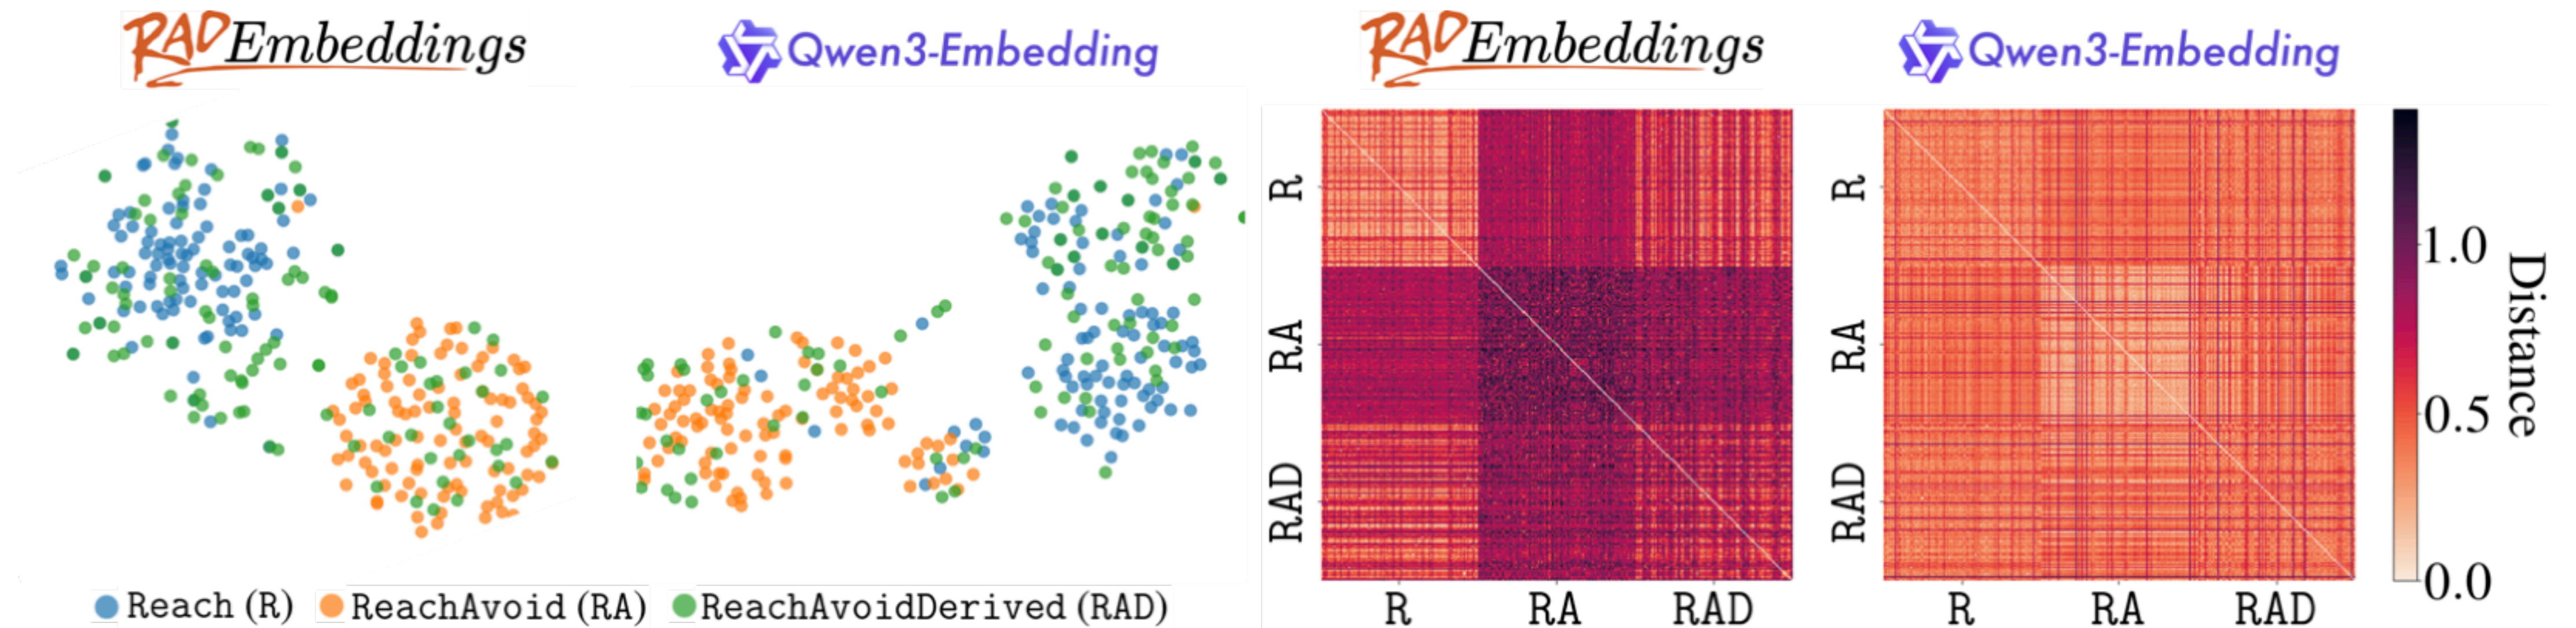

1. RAD Embeddings better distinguish tasks both within and across task classes than instruction embeddings.

Empirical Study

1. How do automaton and instruction embeddings capture similarities across different tasks in latent space?

1. **RAD Embeddings better distinguish tasks both within and across task classes than instruction embeddings.**
