

Empirical Study

• Our goal is to answer the following questions:

1. How do automaton and instruction embeddings capture similarities across different tasks in latent space?

2. How do automation and instruction embeddings affect sample efficiency in policy learning?

3. How do policies conditioned on automaton and/or instruction embeddings perform and generalize?

vs

 Qwen3-Embedding

- Our goal is to answer to the following questions:
 1. How do automaton and instruction embeddings capture similarities across different tasks in latent space?
 2. How do automaton and instruction embeddings affect sample efficiency in policy learning?
 3. How do policies conditioned on automaton and/or instruction embeddings perform and generalize?

Empirical Study

- We precompute automaton-instruction pair datasets for three task types.
